## **Multidisciplinary approach for full mouth rehabilitation**

**Hesham F Shaheen**

King Fahad Armed Forces Hospital, Saudi Arabia

**P**resenting step by step full mouth rehabilitation cases, how we meet the patient and how we alter the bad habits making it possible to give the patient the best treatment possible. After that we emphasize on keeping close follow up to maintain our treatment success. Cases are divided between Fixed, Implant and removable prosthetics; patients are from

different age groups. Audiences are given the opportunity to discuss such cases, and if some have questions about how to imply our routine in their practices they will be given the advice. All the cases have been done in Jeddah Saudi Arabia; cases are of different age groups each with challenging mission to accomplish.
