Two case reports of endodontic retreatment in cases of failure pulpotomy, management and complication

Dalal Mohhamed Alkahtani

Prince Sultan Military Medical City, Saudi Arabia

Abstract: Compared to root canal treatments, coronal pulpotomy is cost effective, less time-consuming and less technically demanding. The success of a pulpotomy depends on the clinicians, appropriate clinical techniques, and materials used.

Clinician may face challenges when performing root canal treatment on calcified canals received pulpotomy approach earlier as it is among the most common finding.

Two such cases reports highlight the importance of knowledge on the morphology of root canal system and having the proper equipment to overcome any mystery.
