

Brief Interview with Dr. Chi-Chao Chan (Editor)

Journal of Clinical & Experimental Ophthalmology

1. What is the research topic you are working on now?

age-related macular degeneration (molecular pathology and animal model), primary vitreoretinal lymphoma (diagnosis), uveitis (immunopathology)

2. How many years have you been associated with the current research?

32

3. What are the attributes for a quality article?

The science.

4. Do you have any research funding (NIH or other national funding) now?

NEI Intramural Research program

5. When did you become an editor of OMICS Journal?

2013

6. What is your greatest career accomplishment?

Cytokine analysis and molecular pathological diagnosis of primary vitreoretinal lymphoma

7. How does the published scientific content assist the potential researchers?

Provide new knowledge and updated references

8. What is the purpose of serving as an editor?

Provide the peer-review to the journal

9. Do you have any patents?

Yes

10. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?

Yes

11. Do you plan to contribute any editorials or papers to OMICS Journals in the next year?

May be

12. How would you define your experience with OMICS Group?

Not much

13. Your opinion on conducting Editorial Board meetings at related Conferences?

Minimal

14. Would you recommend OMICS to your friends or colleagues?

Possible

15. How do you differentiate Journal of Clinical & Experimental Ophthalmology with other journals in the field?

New journal
