

Brief Interview with Dr. Hai-Feng Frank Ji (Executive Editor)

Journal of Nanomedicine & Biotherapeutic Discovery

1. How many years have you been associated with the current research?

More than 22 years

2. What is the research topic you are working on now?

Cancer treatment and detection; solar cell; 3D printing; plasma chemistry

3. What makes an article top quality?

Novelty

4. What are the qualities you look for in an article?

Novelty

5. Do you have any research funding (NIH or other national funding) now?

NSF

6. When did you become an editor of OMICS Journal?

2011.

7. What is your greatest career accomplishment?

Not yet

7. How many years have you been associated with the current research?

30 years.

8. How does the research published percolate through to practitioners?

?

9. What is the purpose of serving as an editor?

Responsibility as a scientist within my research community

8. How many years have you been associated with the current research?

30 years.

9. How many years have you been associated with the current research?

30 years.

10. Do you have any patents?

Yes, four

11. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?

Yes, one

12. Do you plan to contribute any editorials or papers to OMICS Journals in the next year?

Yes.

13. Do you have any trouble with OMICS Journals in the past?

No

14. Would you recommend OMICS to your friends or colleagues?

Yes. Done it before

15. How do you differentiate Journal of Nanomedicine & Biotherapeutic Discovery with other journals in the field?

This is a hard question. The major difference is the open access. This can be good and bad. Readers will significantly appreciate the idea about open access.

However, the impact factor of journals is still one of the main concerns for authors to submit articles. There is still a long way to go for open access journals to gain reputation.
