

Brief Interview with Dr. Jianfei Yang (Editor)

Journal of Clinical & Cellular Immunology

1. What is the research topic you are working on now?

T helper cells in autoimmune diseases.

2. How many years have you been associated with the current research?

15 years.

3. What are the attributes for a quality article?

Interpretation from solid data.

4. Do you have any research funding (NIH or other national funding) now?

All are private funding (our own company).

5. When did you become an editor of OMICS Journal?

2011

6. Where can the journal find the maximum scope in terms of niche?

The critical one is that the journal is cited in PubMed and is given official impact factor by ISI/JCR.

7. What is your greatest career accomplishment?

Discovered novel protein BTLA.

8. How does the published scientific content assist the potential researchers?

Quality papers are attracted and selected for publication.

9. What is the purpose of serving as an editor?

To better serve the Immunology community.

10. Do you have any patents?

Yes.

11. Have you contributed any editorials or papers (any types) to OMICS Journals in the past two years?

Yes.

12. Do you plan to contribute any editorials or papers to OMICS Journals in the next year?

Maybe.

13. How would you define your experience with OMICS Group?

Good.

14. Your opinion on conducting Editorial Board meetings at related Conferences?

It's OK. But I would suggest having regular teleconferences.

15. Would you recommend OMICS to your friends or colleagues?

Yes.

16. How do you differentiate Journal of Clinical & Cellular Immunology with other journals in the field?

It's very hard. First, we need to publish quality papers and list them in the PubMed.

The journal has to be given official impact factor by ISI/JCR.
