

Orthopedic and Osteoporosis

Kate Jones

Longdom Group SA, Avenue Roger Vandendriessche,18, 1150 Brussels, Belgium

ABOUT WEBINAR

Longdom conferences extends our immense pleasure and honor to invite you to attend “International Conference on Orthopedics and Osteoporosis Trauma”, scheduled on September 24-25, 2021 in Vienna, Austria. It is concentrating on the theme “Current intrusion in Orthopedics and Osteoporosis Trauma” to boost and inspect knowledge among academics and industry personnel dealing in the field of orthopedic and osteoporosis Sciences and its related subjects to establish federation and exchange ideas. It aims to provide the right stage to deliver talk by keynote speaker conduct plenary sessions, poster symposia, young researchers forum, video presentations, and workshops.

Orthopaedics is the medical specialty that focuses on injuries and diseases of your body's musculoskeletal system. This complex system, which includes your bones, joints, ligaments, tendons, muscles, and nerves, allows you to move, work, and be active.

Once devoted to the care of children with spine and limb deformities, orthopaedists now care for patients of all ages, from newborns with clubfeet to young athletes requiring

arthroscopic surgery to older people with arthritis. And anybody can break a bone.

After establishing a licensed practice, your orthopaedic surgeon has demonstrated mastery of orthopaedic knowledge by passing certifying examinations given by the American Board of Orthopaedic Surgery (ABOS), American Osteopathic Board of Orthopaedic Surgery (AOBOS), or Royal College of Physicians and Surgeons of Canada. He or she will continue in a career-long Maintenance of Certification process, spending many hours studying, attending continuing medical education courses, and taking self-assessment exams to stay up-to-date.

Certain orthopaedic surgeons meet the qualifications to use the FAAOS letters after their name or to include the logo on their website. This stands for "Fellow of the American Academy of Orthopaedic Surgeons." This is a professional designation that sets them apart from other providers on the bone and joint healthcare team. The FAAOS designation not only distinguishes your orthopaedic surgeon from other healthcare specialists, but also signifies their commitment to continuous education, professional development, and the highest quality of care you expect to receive.
